Important COVID Update Regarding Social Distancing & Quarantine

Dear JB Family,

We hope this communication finds you healthy and safe. You may have seen that the Ohio Department of Health released [updated social distancing guidelines for schools](#). The guidelines note that three (3) feet social distance protocols can be used without the need to quarantine when a positive case is connected to a classroom of students when they are wearing their masks.

Because the CDC recommends six (6) feet as a safe social distance, we will continue to observe 6 ft of distance, handwashing, sanitization, and mask-wearing among our faculty, staff, and students. Though these new guidelines do not change our policies and procedures, we may reference the 3 ft social distance protocols if called to conduct contact tracing for a confirmed case at one of our schools.

We will continue to enforce mask-wearing and will continue to maintain a social distance of 6 ft as much as possible and 3 ft at a minimum so that we can remain in school for our kids.

As always, if you have any questions or concerns, please reach out.

Gratefully yours in mission,

Lannie Davis-Frecker, Jodi Johnston and Jason Wojnicz
